Study tips — conjunctions	164
Review activity	164

A **PREFIX** consists of one or more syllables added to the beginning of a word to change that word's meaning.

nuclear	→	<i>antinuclear</i>
approve	→	<i>disapprove</i>
negotiate	→	<i>renegotiate</i>

A **SUFFIX** consists of one or more syllables added to the end of a word to change that word into a different part of speech (Word, p. 7).

gentle (adjective)	→	gentleness (noun)
love (noun)	→	lovable (adjective)
establish (verb)	→	establishment (noun)
deep (adjective)	→	depth (noun)

To see how prefixes and suffixes work, look at the various English words that come from the Latin verb **duco** (*to lead*). Different prefixes give us verbs such as *induce*, *reduce*, *seduce*, *produce*, and *introduce*. Added suffixes result in different parts of speech, for example: *induction* (noun), *inductive* (adjective), *inductively* (adverb).

3.1 IN ENGLISH

Many English prefixes and suffixes come from Latin and Greek, and some are of native Germanic origin. A good English dictionary will tell you the meaning and function of the various prefixes and suffixes.

Knowing English suffixes can help you identify the parts of speech in a sentence and increase your English vocabulary.

-able, -ible	tolerable	→	adjective
-ly	quickly	→	adverb
-ence, -ance	reliance	→	noun

NOUNS FORMED WITH PREFIXES (Nouns, p. 9)

By adding a prefix to an existing noun, you can form a new noun with a different meaning.

anti- + body (against)	→	<i>antibody</i>
sub- + marine (under)	→	<i>submarine</i>
mal- + nutrition (bad)	→	<i>malnutrition</i>

VERBS FORMED WITH PREFIXES (Verbs, p. 29).

A new verb with a different meaning can be formed by adding a prefix to an existing verb.

He used the tool correctly.
verb

He misused the tool, and it broke.
verb

A verb can also be formed by adding a prefix to another part of speech.

Anja is my new friend.
noun

She befriended me on my first day at the new school.
verb

3.2 IN GERMAN

As in English, prefixes and suffixes can be used to change the meaning of words and to change a word's part of speech.

NOUNS FORMED WITH SUFFIXES

Certain suffixes not only affect the meaning of a noun but also determine the gender of the noun being formed (Gender, p. 20).

- noun + **-chen** and **-lein** → new noun is neuter
These suffixes show that the noun is a diminutive, i.e., something reduced in size.

Noun		New noun neuter	
das Brot (neut.)	<i>bread</i>	das Brötchen	<i>roll, little bread</i>
der Brief (masc.)	<i>letter</i>	das Brieflein	<i>small letter</i>
die Kerze (fem.)	<i>candle</i>	das Kerzlein	<i>little candle</i>

- adjective + **-heit**, **-keit**, **-ung**, **-nis**, etc. → feminine noun
These suffixes turn an adjective into a noun expressing an abstract quality (p. 116).

Adjective		Feminine noun	
schön	<i>beautiful</i>	die Schönheit	<i>beauty</i>
frei	<i>free</i>	die Freiheit	<i>freedom</i>
möglich	<i>possible</i>	die Möglichkeit	<i>possibility</i>
finster	<i>dark</i>	die Finsternis	<i>darkness</i>
beobachten	<i>to observe</i>	die Beobachtung	<i>observation</i>

VERBS FORMED WITH PREFIXES

The infinitive form of a verb is always one word, i.e., the prefix is part of the verb: **ausgehen** (*to go out*), **besuchen** (*to visit*). However, that is not always the case when the verb is conjugated (Conjugation, p. 50). Prefixes are divided into two groups depending on whether or not they can be separated from the verb.

- **SEPARABLE PREFIXES** – German verbs with separable prefixes are similar to English verbs that are regularly used with a preposition (Prepositions, p. 74); namely, they are separate words functioning as a unit with the verb.

They *are going* out tonight at 7:00 P.M.
preposition

He *picks* up his friend after class.
preposition

Separable prefixes in German include the following: **ab-**, **an-**, **auf-**, **aus-**, **bei-**, **ein-**, **fort-**, **her-**, **hin-**, **mit-**, **nach-**, **vor-**, **weg-**, **weiter-**, **zurück-**, **zusammen-**. Let us look at two examples to see how these prefixes can be separated from the verb.

Infinitive	Sentence
ausgehen (<i>to go out</i>)	Hans und ich gehen morgen aus . <i>Hans and I are going out tomorrow.</i>
ankommen (<i>to arrive</i>)	Der Zug kommt heute spät an . <i>The train is arriving late today.</i>

- **INSEPARABLE PREFIXES** – German verbs with inseparable prefixes function as one word since these prefixes are never separated from the basic verb. Inseparable prefixes in German include the following: **be-**, **emp-**, **ent-**, **er-**, **ge-**, **miss-**, **ver-**, **zer-**. Let us look at two examples.

Infinitive	Sentence
besuchen (<i>to visit</i>)	Wir besuchen unsere Tante. <i>We are visiting our aunt.</i>
vergessen (<i>to forget</i>)	Du vergißt immer dein Buch. <i>You always forget your book.</i>

Some prefixes, such as **durch-**, **über-**, **um-**, and **unter-**, can be either separable or inseparable depending on usage. Your German textbook will explain the rules for using verbs with separable and inseparable prefixes. When you learn a new verb formed with a prefix, memorize whether the prefix is separable or not.

STUDY TIPS

PREFIXES AND SUFFIXES

Flashcards

- 1 Create flashcards of German verbal prefixes (**an-, mit-, ver-, ent-, etc.**). On the back of the card, write “Sep” (separable) or “Insep” (inseparable). If the prefix is easily translated, add the English translation. Underneath, write an example word using that prefix. If the verb has a separable prefix, add a short example sentence to illustrate the separation.

mit-	Sep; <i>with</i> mitkommen (<i>to come along</i>)
ver-	Insep verstehen (<i>to understand</i>)

Some textbooks use a period to distinguish separable prefixes from inseparable prefixes.

an.kommen (<i>to arrive</i>)	- separable
bekommen (<i>to receive</i>)	- inseparable

- 2 Create another set of flashcards. On the German side, write the infinitive of the verb stem at the top of the card. Underneath it, make two columns: one for the verb stem with separable prefixes, the other for the verb stem with inseparable prefixes. On the back, using the same layout, write the English translations.

Verb stem: stehen *to stand*

Sep. prefix

aufstehen *to stand up*
anstehen *to stand in line*

Insep. prefix

bestehen *to pass a test*
verstehen *to understand*

Practice

- 1 Learn the meaning of the verb stem by flipping the cards first on the German side and then on the English side.
- 2 Learn the meaning of the verbs with prefixes by flipping cards as under #1. Occasionally, the meaning of the prefixes will give you a clue as to the change of meaning of the verb stem.
- 3 Do the above exercises orally as the verb forms with separable prefixes are pronounced differently from those with inseparable prefixes: if the prefix is separable, it is the stressed part of the verb form (**auf**stehen), if the prefix is inseparable, it is the verb stem that is the stressed part of the verb form (ver**stehen**).

REVIEW ACTIVITY

I. Underline the prefixes in the following words.

- a. decode
- b. enlarge
- c. misunderstand
- d. recover
- e. preserve
- f. performance

II. Underline the suffixes in the following words.

- a. dependency
 - b. graceful
 - c. sleepless
 - d. exquisitely
 - e. happiness
 - f. questionable
-

A **RELATIVE PRONOUN** is a word used at the beginning of a clause that gives additional information about someone or something previously mentioned.

clause
additional information about *the book*

I'm reading the book *that* the teacher recommended.

A relative pronoun serves two purposes:

- as a pronoun it stands for a noun or an idea previously mentioned. The noun or idea to which it refers is called the **ANTECEDENT**.

Here comes the boy *who* broke the window.
antecedent of the relative pronoun *who*

The weather was terrible, *which* ruined the picnic.
this entire independent clause is the antecedent of the relative pronoun *which*

- it introduces a **SUBORDINATE CLAUSE**, also called a **DEPENDENT CLAUSE**; that is, a group of words having a subject and a verb that cannot stand alone because it does not express a complete thought. A subordinate clause is dependent on a **MAIN CLAUSE**; that is, another group of words having a subject and a verb that can stand alone as a complete sentence (Sentence, p. 149).

$\left(\begin{array}{c} \text{main clause} \\ \hline \text{Here } \underline{\text{comes}} \text{ the } \underline{\text{boy}} \\ \text{verb} \qquad \text{subject} \end{array} \right)$	$\left(\begin{array}{c} \text{subordinate clause} \\ \hline \underline{\text{who}} \text{ } \underline{\text{broke}} \text{ } \underline{\text{the window.}} \\ \text{subject verb} \end{array} \right)$
---	---

A subordinate clause that starts with a relative pronoun is also called a **RELATIVE CLAUSE**. In the example above, the relative clause starts with the relative pronoun *who* and gives us additional information about the antecedent *boy*.

Relative clauses are very common. We use them in everyday speech without giving much thought as to how we construct them. The relative pronoun allows us to combine two thoughts, which have a common element, into a single sentence. In this chapter, the relative clauses are underlined.

44.1 COMBINING SENTENCES WITH A RELATIVE PRONOUN

When sentences are combined with a relative pronoun, the relative pronoun can have different functions in the relative clause. It can be the subject, the direct object, the indirect object, or the object of a preposition.

Let us look at some examples of how sentences are combined.

- relative pronoun as a subject (Subject, p. 45).

SENTENCE A The students passed the exam.

SENTENCE B They studied.

1. **COMMON ELEMENT** – Identify the element sentences A and B have in common.

Both *the students* and *they* refer to the same persons.

2. **ANTECEDENT** – The common element in sentence A will be the antecedent of the relative pronoun. The common element in sentence B will be replaced by a relative pronoun.

The students is the antecedent. *They* will be replaced by a relative pronoun.

3. **FUNCTION** – The relative pronoun in the relative clause has the same function as the word it replaces.

They is the subject of *studied*. It will be replaced by a subject relative pronoun.

4. **PERSON OR THING** – Identify whether the antecedent refers to a person(s) or a thing(s).

The antecedent *students* refers to persons.

5. **SELECTION** – Choose the relative pronoun according to its function and its antecedent (steps 3 and 4 below).

who

6. **RELATIVE CLAUSE** – Place the relative pronoun at the beginning of sentence B, thus forming a relative clause.

who (that) studied

7. **PLACEMENT** – To combine the two clauses, place the relative clause right after its antecedent.

The students *who (that) studied* passed the exam.

- relative pronoun as a direct object (Objects, p. 63)

SENTENCE A This is the student.

SENTENCE B I saw him.

1. **COMMON ELEMENT:** *the student* and *him*
2. **ANTECEDENT:** *the student*
3. **FUNCTION:** *him* is the direct object
4. **PERSON OR THING:** *the student* is a person
5. **SELECTION:** *that* or *whom*
6. **RELATIVE CLAUSE:** *that (whom) I saw*
7. **PLACEMENT:** *the student + that (whom)*

This is the student *(that, whom)* I saw.

- relative pronoun as an indirect object (Objects, p. 63)

SENTENCE A This is the student.

SENTENCE B I gave him advice.

1. COMMON ELEMENT: *the student* and *him*
2. ANTECEDENT: *the student*
3. FUNCTION: *him* is the indirect object
4. PERSON or thing: *the student* is a person
5. SELECTION: *to whom*
6. RELATIVE CLAUSE: *to whom* I gave advice
7. PLACEMENT: the student + *to whom* I gave advice

This is the student to whom I gave advice.

- relative pronoun as an object of a preposition (Prepositions, p. 80)

SENTENCE A This is the student.

SENTENCE B I spoke with him.

1. COMMON ELEMENT: *the student* and *him*
2. ANTECEDENT: *the student*
3. FUNCTIONS: *him* is the object of the preposition *with*
4. PERSON or thing: *the student* is a person
5. SELECTION: *whom*
6. RELATIVE CLAUSE: *with whom* I spoke
7. PLACEMENT: the student + *with whom* I spoke

This is the student with whom I spoke.

44.2 SELECTION OF A RELATIVE PRONOUN

— IN ENGLISH —

The selection of a relative pronoun in English depends not only on its function in the relative clause, but also on whether its antecedent is a “person” (human beings and animals) or a “thing” (objects and ideas). In standard and written English, *who* or *whom* are the relative pronouns used to refer to persons. In spoken English, they are often replaced by *that*. Moreover, in certain functions the relative pronoun is omitted altogether.

STANDARD: The teacher (*whom*) you wanted to see is not here.

SPOKEN: The teacher (*that*) you wanted to see is not here.

The distinction between spoken and standard English is important. In this chapter we refer to standard English which includes a relative pronoun.

— IN GERMAN —

Unlike English, the same set of relative pronouns is used for antecedents referring to persons and things and, more importantly, relative pronouns can never be omitted.

German relative pronouns are based on two factors:

1. GENDER AND NUMBER — the gender and number of the antecedent.
2. CASE FORM — their function in the relative clause

We shall look at each function separately. Notice that relative clauses are always separated by a comma from the main clause.

44.3 SUBJECT OF THE RELATIVE CLAUSE

IN ENGLISH

There are three relative pronouns that can be used as subjects of a relative clause, depending on whether the relative pronoun refers to a person or a thing. When it is the subject of a relative clause, the relative pronoun is never omitted.

PERSON — who (or that) → subject of the relative clause

She is the only student who (that) answered all the time.

THING — which or that → subject of the relative clause

The movie which is so popular was filmed in Germany.

The movie that is so popular was filmed in Germany.

Notice that the relative pronoun subject is always followed by a verb.

IN GERMAN

Relative pronouns that are the subject of the relative clause are in the nominative case. The form depends on the gender and number of the antecedent.

Singular

Masculine	der	<i>who, that, which</i>
Feminine	die	
Neuter	das	
Plural	die	

To choose the correct form,

1. ANTECEDENT — Find the antecedent. (Don't forget that the antecedent is always the noun that precedes the relative pronoun.)
2. NUMBER & GENDER — Determine the number and gender of the antecedent.
3. SELECTION — Select the corresponding form in the nominative case.

Here is an example.

- The man who visited us was nice.
- 1. ANTECEDENT: man
 - 2. NUMBER & GENDER: **der Mann** (*the man*) is masculine singular
 - 3. SELECTION: masculine singular nominative → **der**
- Der Mann, der uns besuchte, war nett.

44.4 DIRECT OBJECT OF THE RELATIVE CLAUSE

IN ENGLISH

There are three relative pronouns that can be used as direct objects of a relative clause, depending on whether the relative pronoun refers to a person or a thing. Since relative pronouns are often omitted when they are objects of a relative clause, for reference we have indicated them in parentheses in the examples below in standard English.

PERSON — *whom* (or *that*) → object of a relative clause

- as a direct object
This is the student (*whom, that*) I saw yesterday.
- as an indirect object
Ingrid is the person to whom he gave the present.

THING — *which* (or *that*) → object of a relative clause

- as a direct object
This is the book (*which*) Axel bought.
This is the book (*that*) Axel bought.
- as an indirect object
Here is the library to which he gave the book.

IN GERMAN

Relative pronouns that are the direct objects of the relative clause are either in the accusative or dative case, depending on the verb. The form used depends on the gender and number of the antecedent.

	Accusative	Dative	
Singular			
Masculine	den	dem	who, that, which
Feminine	die	der	
Neuter	das	dem	
Plural	die	denen	

Unlike English, relative pronouns are never omitted in German. (For reference, the equivalent English relative pronouns below are in parentheses.)

- as a direct object → accusative or dative

*Here is the student (**whom, that**) Franz saw last night.*

Hier ist der Student, **den** Franz gestern Abend sah.
masc. sing. masc. sing. acc.

*The bag (**that**) I'm buying is expensive.*

Die Tasche, **die** ich kaufe, ist teuer.
fem. sing. fem. sing. acc. (**kaufen** takes an accusative object)

*The cat (**that**) the dog followed was black.*

Die Katze, **der** der Hund folgte, war schwarz.
fem. sing. fem. sing. dat. (**folgen** takes a dative object)

44.5 INDIRECT OBJECT OR OBJECT OF A PREPOSITION IN A RELATIVE CLAUSE

IN ENGLISH

Relative pronouns used as indirect objects or as objects of a preposition are the same as those used as direct objects. As is the case with other relative pronouns used as objects, they are often omitted. By integrating the preposition “to” before indirect objects and any other preposition within the sentence, you will be able to restore the relative pronoun.

PERSON — *whom* (or *that*) → indirect object or object of a preposition in a relative clause

Here is the student (that) Franz gave the book to.
dangling preposition

Here is the student to whom Franz gave the book.

Ingrid is the person (that) he went out with.
dangling preposition

Ingrid is the person with whom he went out.

THING — *which* (or *that*) → object of a preposition in a relative clause

This is the library that he was talking about.
dangling preposition

This is the library about which I was talking.

IN GERMAN

Relative pronouns that are the indirect objects take the dative case. Relative pronouns that are objects of a preposition take the case required by the preposition and reflect the gender of the antecedent. Since German places prepositions directly preceding their objects, you will need to restructure English phrases with dangling prepositions.

*Here is the person (that) I was waiting **for**.* →

*Here is the person **for whom** I was waiting.*

Hier ist die Person, **auf die** ich wartete.

fem. sing. fem. sing. **auf** + acc.

*Here is the person (that) I was speaking **with**.* →

*Here is the person **with whom** I was speaking.*

Hier ist die Person, **mit der** ich sprach.

fem. sing. fem. sing. **mit** + dat.

44.6 RELATIVE PRONOUN AS POSSESSIVE MODIFIER

IN ENGLISH

The possessive modifier *whose* does not change its form regardless of its function in the relative clause.

Here are the people whose car was stolen.
antecedent possessive modifying car

Look at the house whose roof was fixed.
antecedent possessive modifying roof

IN GERMAN

The possessive modifier is always in the genitive case. The form used depends on the gender of the antecedent.

Genitive

Singular

Masculine	dessen
Feminine	deren
Neuter	dessen

whose

Plural

deren

Let's look at an example.

- Hans, **whose** alarm clock was broken, overslept.*
1. ANTECEDENT: Hans
 2. NUMBER & GENDER: *Hans* is masculine singular.
 3. SELECTION: **dessen**
- Hans, **dessen** Wecker kaputt war, hat sich verschlafen.

44.7 SUMMARY OF RELATIVE PRONOUNS

Here is a chart you can use as reference.

Function in relative clause	Antecedent singular			Antecedent plural
	Masculine	Feminine	Neuter	
Nominative	der	die	das	die
Accusative	den	die	das	die
Dative	dem	der	dem	denen
Genitive	dessen	deren	dessen	deren

44.8 RELATIVE PRONOUNS WITHOUT ANTECEDENT

There are relative pronouns that refer to an antecedent that has not been expressed or to an entire idea.

IN ENGLISH

The relative pronoun *which* can be used without an antecedent.

- She didn't do well, **which** is too bad.*
- antecedent an idea: the fact that she didn't do well

IN GERMAN

There is also one relative pronoun that can be used without an antecedent: *was* (*which, what*).

- Anna hat uns eingeladen, **was** wir nett gefunden haben.*
- Anna invited us, **which** we found nice.*

Your textbook may give you examples of other instances that require the use of *was* as a relative pronoun.

STUDY TIPS

RELATIVE PRONOUNS

Pattern

To help you remember the forms of the relative pronouns, look for similarities with another part of speech such as definite articles.

Relative pronouns

	masc.	fem.	neut.	pl.
Nominative	der	die	das	die
Accusative	den	die	das	die
Dative	dem	der	dem	denen
Genitive	dessen	deren	dessen	deren

Definite articles

	masc.	fem.	neut.	pl.
Nominative	der	die	das	die
Accusative	den	die	das	die
Dative	dem	der	dem	den
Genitive	des	der	des	der

What are the similarities between relative pronouns and definite articles?

- nominative, accusative, and dative singular → identical
- genitive and dative plural → same first 3 letters (**des-, der-, des-, der-**)

Practice

Write two sentences that use the same noun in each sentence. Underline the noun, label its gender, and identify its function (case) in each sentence. Combine the two sentences, replacing one of the nouns with a relative pronoun. Pay attention to the case of the relative pronoun and the verb placement in the relative clause.

Der Bus ist spät.

der Bus: masc., subject → nom.

Ich warte auf **den Bus**.

den Bus: masc., direct object → acc.

Der Bus, auf den ich warte, ist spät.

The bus is late. I'm waiting **for the bus**. → **The bus** (that) I'm waiting for is late.

REVIEW ACTIVITY

I. Circle the antecedent of the relative pronoun in the following sentences.

Identify the function of the relative pronoun: subject (S), direct object (DO), indirect object (IO), object of a preposition (OP), possessive modifier (PM).

- | | | | | | |
|---|---|----|----|----|----|
| a. I received the letter that you sent me. | S | DO | IO | OP | PM |
| b. Those are the people who speak German. | S | DO | IO | OP | PM |
| c. The woman whom you met left today. | S | DO | IO | OP | PM |
| d. This is the book whose title I forgot. | S | DO | IO | OP | PM |
| e. Kit is the student about whom I spoke. | S | DO | IO | OP | PM |
| f. German is a language that about
130 million people speak. | S | DO | IO | OP | PM |

II. The common elements in the sentence below have been highlighted. Fill in the information requested to find the correct relative pronoun and write a new English sentence using a relative pronoun.

- a. The dog is friendly. It lives next door.
 Function of element to replace: _____
 Relative pronoun: _____
 Combined sentence: _____
- b. The Smiths left for Austria. You met them in Basel.
 Function of element to replace: _____
 Relative pronoun: _____
 Combined sentence: _____
- c. The new student is German. You were asking about her.
 Function of element to replace: _____
 Relative pronoun: _____
 Combined sentence: _____
- d. Andreas is my neighbor. His new car is parked outside.
 Function of element to replace: _____
 Relative pronoun: _____
 Combined sentence: _____
